

IVY TECH
COMMUNITY COLLEGE

3D Design & 3D Additive Manufacturing Camp

Students in grades 5-7 will be engaged in the creative design of 3D CAD (Computer Aided Design) models to create a race car. They will then see how products can be designed and created using additive manufacturing (3D printing) with geometries that are not possible with other technologies. Students will also get to tour a modern design facility and 3D printing lab.

Camp Schedule:

Week 1 – July 11-15, 2016

Grades 5-7

- 3D CAD (Computer Aided Design)
- 3-D Printing (Additive Manufacturing)

Why choose Ivy Tech Camps?

Students attending our summer camps will use state-of-the-art equipment that will provide a real-world, hands-on approach to modern design and manufacturing.
